# Introduction of OTPTOKEN

## WHITEPAPER - OTPTOKEN

The OTP Token is the ideal token for starters in Crypto : low introduction price so real growth potential, friendly community to support you and a wide range of Exchanges and Wallets. For every starter, the OTP is the ideal token to learn all aspects of crypto trading with very low financial risk. But also for the experienced crypto user, the OTP Token offers a nice diversification of your current crypto wallet.

A deflationary asset and stable token with dumping protections and monetary incentives for holding is the goal of OTPTOKEN. It is a utility token. Additional burns and reward systems, such as yield farming/staking, airdrops, and NFT drops, are being considered and will be implemented into the Tokenomics of OTPTOKEN.

OTPTOKEN Network plans on becoming a blockchain enterprise specifically designed for global payments. OTPTOKEN is a fully decentralized ecosystem with peer-to-peer transactions developed on the Binance Smart Chain (BSC). OTPTOKEN initially ran on the BSC blockchain with BEP 20 Standard but has since become the native coin of the OTPTOKEN.

# Enter Blockchain

Mining is therefore not just about creating new money but also validating transactions. With cryptocurrency, the task is undertaken with blockchain using a form of math's called cryptology. Blockchain is a secure record of every single Transaction made using a Cryptocurrency. Verified transaction is added to the blockchain as part of the mining process. In banking, this is done with a ledger which tracks the flow of money through accounts. While it's possible to buy cryptocurrency all you need is a digital wallet as part of a free app or a cryptocurrency tax software-finding places that will accept it, the variable transaction charges and volatile exchange rates make buying and selling with it difficult.

**WHITEPAPER - OTPTOKEN**

# Development Team

The group is completely dedicated to the Improvement and age of the a companying for OTPTOKEN. Software development teams work Together to build a technical project or product. OTPTOKEN Every person on the development team plays a part in making this happen and should be held Accountable for their work. The group is completely dedicated to the Improvement and age of the Company. The system runs smoothly across the Globe while providing fool proof data security. Thanks to Blockchain infrastructure, every single node in the system has its own unique identity. Blockchain technology increases the security and speeds up the exchange of information in a way that is cost-effective and more transparent.
